

AFTER YEARS OF TELLING PEOPLE CHEMOTHERAPY IS THE ONLY WAY TO TRY ('TRY', BEING THE KEY WORD) TO ELIMINATE CANCER, JOHNS HOPKINS IS FINALLY STARTING TO TELL YOU THERE IS AN ALTERNATIVE WAY .

Cancer Update from Johns Hopkins:

Johns Hopkins has recently sent this out in its newsletters. This information is being circulated at Walter Reed Army Medical Center as well. Dioxin chemicals cause cancer, especially breast cancer. Dioxins are highly poisonous to the cells of our bodies. Don't freeze your plastic bottles with water in them as this releases dioxins from the plastic. Recently, Dr Edward Fujimoto, Wellness Program Manager at Castle Hospital , was on a TV program to explain this health hazard. He talked about dioxins and how bad they are for us. He said that we should not be heating our food in the microwave using plastic containers. This especially applies to foods that contain fat. He said that the combination of fat, high heat, and plastics releases dioxin into the food and ultimately into the cells of the body. Instead, he recommends using glass, such as Corning Ware, Pyrex or ceramic containers for heating food. You get the same results, only without the dioxin. So such things as TV dinners, instant ramen and soups, etc., should be removed from the container and heated in something else. Paper isn't bad but you don't know what is in the paper. It's just safer to use tempered glass, Corning Ware, etc. He reminded us that a while ago some of the fast food restaurants moved away from the foam containers to paper the dioxin problem is one of the reasons.

- A. No plastic containers in micro.
- B. No water bottles in freezer.
- C. No plastic wrap in microwave..

1. Every person has cancer cells in the body. These cancer cells do not show up in the standard tests until they have multiplied to a few billion. When doctors tell cancer patients that there are no more cancer cells in their bodies after treatment, it just means the tests are unable to detect the cancer cells because they have not reached the detectable size.
2. Cancer cells occur between 6 to more than 10 times in a person's lifetime.
3. When the person's immune system is strong the cancer cells will be destroyed and prevented from multiplying and forming tumors.
4. When a person has cancer it indicates the person has nutritional deficiencies. These could be due to genetic, but also to environmental, food and lifestyle factors.
5. To overcome the multiple nutritional deficiencies, changing diet to eat more adequately and healthy, 4-5 times/day and by including supplements will strengthen the immune system.
6. Chemotherapy involves poisoning the rapidly-growing cancer cells and also destroys rapidly-growing healthy cells in the bone marrow, gastrointestinal tract etc., and can cause organ damage, like liver, kidneys, heart, lungs etc.
7. Radiation while destroying cancer cells also burns, scars and damages healthy cells, tissues and organs.
8. Initial treatment with chemotherapy and radiation will often reduce tumor size. However prolonged use of chemotherapy and radiation do not result in more tumor destruction.

The following is additional information from bozomer on how our Pure Organic Sulfur Crystals relate to the John Hopkins newsletter.

HOW ORGANIC SULFUR CRYSTALS PLAY AN IMPORTANT ROLE

Cancer cells cannot thrive in an oxygenated environment. Exercise daily, and deep breathing help to get more oxygen down to the cellular level. Oxygen therapy is another means employed to destroy cancer cells.

Avoid coffee, tea, and chocolate, which have high caffeine. Green tea is a better alternative and has cancer fighting properties. Water-best to drink purified water, or filtered, to avoid known toxins and heavy metals in tap water. Distilled water is acidic, avoid it. STOP drinking soda today – very acidic.

In 1931 [Dr. Otto Warburg](#) won the Nobel Prize for his discovery that the root cause of cancer was [acidosis](#) (too much acid in the body fluids) and [hypoxia](#) (oxygen deficiency). Research that Dr. Warburg conducted 8 years earlier revealed that cancer cells are anaerobic and cannot survive in the presence of high levels of oxygen. What Dr. Warburg described was anaerobic cellular metabolism in the carbon dioxide or waste gas which remains in the cell when oxygen is not transported into the cell. Gas transports is cellular respiration, no new oxygen in to PUSH the carbon dioxide out.

Research shows that viral infections are also anaerobic and viral conditions like Hep C and HIV cause cellular degeneration not only in the liver but other cellular systems. **Oxygen is the enemy of all viruses whether due to its presence in the cell or the flexibility of the cell membrane which makes the virus incapable of tearing into the cell.**

What Organic Sulfur Does

Sulfur enables the transport of oxygen across cell membranes, and oxygen is necessary for healthy cellular regeneration in mammals. Plants, on the other hand, require carbon dioxide for cell regeneration, and plants can store sulfur, while man cannot. Man eliminates carbon dioxide, and plants eliminate oxygen. Thus, the sulfur cycle is symbiotic and vital for life as we know it.

PURE ORGANIC SULFUR CRYSTALS

99.9% Organic Sulfur / 0.1% Water

Bioavailable Sulfur Supplement * Highest Quality Food Grade

Made in U.S.A.
